BTL ROBOTICS

Redefining Motion Recovery

Robotics Deliver Up to 75% Greater Outcomes*

Did you know that every 2 seconds someone suffers from a stroke? Unfortunately, only 1 in 10 stroke patients achieves full recovery through conventional therapy.

Neurorehabilitation with robotic devices outperforms conventional methods through more intensive, repeatable, and precisely guided training as rehabilitation robots enable faster, smarter, and more natural recovery while reducing therapist workload.

R-TOUCH®

Grab Your Life

R-LEAD®

Power Your Arm

R-GAIT®

First Step Into Recovery

BTL WALK™

The Only 2-in-1 Wearable Technology for Drop Foot

BTL EXO®

Naturally Perfect Gait,
Wherever Needed

R-FORCE®

Zero
Gravity

R-GAIT®

FIRST STEP INTO RECOVERY

R-GAIT is an end-effector stroke rehabilitation robot that restores the patient's ability to walk.

Designed for adult and pediatric patients, it delivers an unmatched natural walking motion.

1 Stage
Robotic Early Gait Recovery

The most Natural Gait Pattern

Learn More

BTL EXO®

NATURALLY PERFECT GAIT, WHEREVER NEEDED

BTL EXO is a free-walking medical exoskeleton that dynamically supports and enhances lower limb motor function to help your patients relearn proper gait patterns.

Autonomous
Natural Walking

Designed for
Any Environment

Learn More

R-FORCE®

ZERO GRAVITY

R-FORCE is the only rehabilitation treadmill that enables active training with full body-weight support, using air pressure to reduce the patient's weight by up to 100%.

The Only Zero Gravity Treadmill

1 Day Training Right After injury

Learn More

BTL WALK™

THE ONLY 2-IN-1 WEARABLE TECHNOLOGY FOR DROP FOOT

BTL WALK is the only device for foot drop on the market that supports patients through both gait preparation and independent walking. It promotes a natural, secure gait, enhancing mobility and independence on any terrain.

Unique EMG-Driven Biofeedback

Adaptive Gait Sensing & Precise Stimulation

R-TOUCH®

GRAB YOUR LIFE

R-TOUCH is a rehabilitation robot glove for hand and arm motion restoration. It provides passive, assistive, and active training for the fingers, while the arm is dynamically supported and precisely tracked by a motion sensor.

2 in 1 The Only Robotic Rehabilitation for Both Hand & Arm

Highest Level of Precision

Learn More

R-LEAD®

POWER YOUR ARM

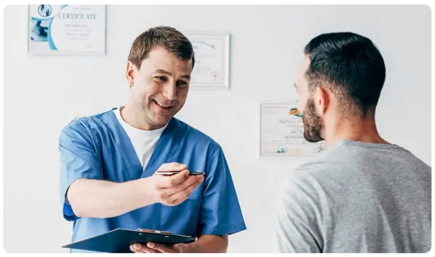

R-LEAD is a cutting-edge solution for upper limb training which tracks and guides the arm in space through interactive on-screen exercises. It combines active rehabilitation with cognitive training for more effective results.

We Have The Perfect Fit for Your Medical Practice

Rehabilitation Practices

Whether you are a physiotherapist or someone specializing in neurorehabilitation, our stroke rehabilitation devices help you provide outstanding patient care.

Medical Centers

We provide the most comprehensive range of neurorehabilitation equipment on the market to fit the needs of all clinics and health centers.

Hospitals

Our vast market experience, international expertise and exceptional device quality make us a valuable long-term partner for hospitals and healthcare facilities.
